

Naked Coupon Technology

Tracking Without A Click Is Possible

LinkConnector's platform provides merchants with many **Adaptive Attribution** capabilities. One that is increasingly sought out by affiliates is Coupon Code Attribution, which allows merchants to attribute credit based on private, unique coupon codes.

LinkConnector goes a step beyond Coupon Code Attribution to enable its merchant customers to attribute affiliate transactions across multiple marketing channels (e.g. social media, radio ads, direct mail, etc.) with only a private coupon code and without the need for a click or cookie—this is the beauty of LC's **Naked Coupon** technology.

Expand Promotion Beyond Coupon Partners:

- For merchants looking to increase their social media presence, Naked Coupons empower affiliates to showcase merchant promotions without a click—giving the social post (and/or pin) a much better chance of reaching audiences.
- Naked Coupons also allow for online crediting of offline affiliate or partner promotion. Imagine the reach an influential speaker could have at a conference by including a branded coupon code in their presentation, or a blogger touting your coupon code during a television appearance?

Why Affiliates Love Naked Coupons:

- Affiliates are now empowered to reach potential customers for a merchant in ways never before possible in the affiliate marketing channel—and in a way that specifically adds incremental value.
- Naked Coupon technology protects affiliates' private coupons. Even if competitors steal their hard earned coupon codes, the original affiliate owner always receives credit as the code uniquely belongs to them.
